<u>Customer</u> Université Catholique de Louvain		<u>Service Order No.</u> 000320224722
<u>Purchase Order No</u> EU-SPAS-8BNDZR	<u>Order Type</u> SM02	<u>Maintenance Activity</u> REP

<u>Work Description</u> 3/12/2010 SP - Veriti fppm
<p>Instrument performance verification after fire in the lab. Cleaned instrument exterior and performed necessary temperature and instrument performance tests. See Planned Maintenance checklist and results page for details ... all tests pass</p> <p>Although all tests pass, it is impossible to predict how the fire will influence instrument's performance in the futur. Not all residue from the fire (dust etc) could be removed so Applied Biosystems can not guarantee instrument performance in the futur. Customer has to make the decision to keep or replace the Veriti.</p>
